

Full Project List

Project	Scope	Client	Company worked for	Location
CNMI shelter-building and courthouse security-improvement program	Served as owner's representative for a \$1.8M program covering security improvements to six shelter buildings and three courthouses totaling 60,000 square feet combined, including security cameras and door hardening	CNMI government	Weigh Anchor	Across all three CNMI islands
Pfizer Seismic Program development	Served as prime consultant for a \$180K program; cataloged equipment, MEP systems, and exterior equipment; managed the engineering firm; and produced the final report adopted by Pfizer West	Pfizer	Weigh Anchor	Pfizer West sites
Pfizer warehouse retrofit	Coordinated racking, fire-sprinkler clearance, architect activity, permitting, temperature-controlled MEP, validation, and completed-project lessons	Pfizer	Weigh Anchor	Site pending
B1 N124 biosafety-cabinet vacuum-line modification	Changed the field concept to a third branch on the existing vacuum line, coordinated Lewis Construction and MacDonald-Miller, managed PTW/SRA documentation and the shutdown, witnessed the tie-in, and restored service before laboratory operations	Pfizer	Weigh Anchor	Building 1, room N124, Bothell, WA
Twinguard freezer installation and cold-storage closeout	Coordinated arrival, placement, installation, seismic work, facilities, IT, EHS, final photography, and formal closeout	Pfizer	Weigh Anchor	Bothell, WA
Seagen regulated warehouse retrofit	Led the execution phase for an empty-shell warehouse conversion, including existing conditions, design coordination, municipal permitting, racking, MEP, fire protection, contractor oversight, punch work, and handoff support	Seagen	Arcadis	Bothell, WA area
Incucyte system installation and contractor work	Managed site readiness, quote and PO, field walkthrough, SRA/PTW, contractor execution, equipment placement, installation, and completed-task closeout	Seagen	Arcadis	Bothell, WA
INTEGRA Westcapper installation	Coordinated arrival, placement, vendor installation, facilities, EHS, IT, final photography, and closeout	Seagen	Arcadis	Bothell, WA
Rheometer installation	Coordinated arrival, placement, installation, facilities, EHS, IT, installed-condition photography, and ServiceNow closeout	Seagen	Arcadis	Bothell, WA
Amnis CellStream flow-cytometer installation	Coordinated placement, 100-240 V power, emergency-power connection, Ethernet activation, EHS review, installation, and installed-condition photography	Seagen	Arcadis	Bothell, WA
NanoString installation	Managed equipment arrival, placement, instrument installation, facilities coordination, and EHS readiness	Seagen	Arcadis	Bothell, WA
BTC Crested Butte RO container build, SAP 2034/001084	Managed four MST-600M reverse-osmosis container assets across engineering, supply chain, manufacturing, labor recovery, schedule, inspection readiness, and handoff	Evoqua Temporary Equipment Services / EWT Schaumburg	Evoqua Water Technologies	Built in Colorado Springs, CO; end site associated with Crested Butte
Rotameter inspection test stand	Designed and built an AutoCAD Inventor test stand and 3D-printed adapter to improve CDI component inspection and finished-product quality	Evoqua internal manufacturing	Evoqua Water Technologies	Boston/Tewksbury, MA
CDI production-scheduling system	Built and deployed a production-scheduling tool that reduced work in process and improved capacity and material visibility	Evoqua internal manufacturing	Evoqua Water Technologies	Boston/Tewksbury, MA
Loveland Memcor UF container project	Managed a six-container program with rack assemblies, CIP skid, citric-acid skid, sulfuric-acid skid, hypochlorite skid, CDR/FDR, BOM release, and RFC/ECN work	End customer pending	Evoqua Water Technologies	Built in Colorado Springs, CO; final site associated with Loveland
Modi Base Stations	Managed two monitoring/base stations for existing light-industry trailers, including the communication plan and O&M-manual closeout work	End customer pending	Evoqua Water Technologies	Built in Colorado Springs, CO; final site pending

Project	Scope	Client	Company worked for	Location
Evoqua \$2M expedited internal asset build	Completed an expedited internal build in three months versus a normal six-month cycle	Evoqua internal	Evoqua Water Technologies	Colorado Springs, CO
GE Rutland Closed-Loop Electrolyte Recycle Treatment Optimization	Reviewed the treatment process, solids-removal target, clarifier flow limits, and chemical introduction; coordinated GE Water input and optimized chemical dosing	GE Aviation ECM business	GE Aviation	Rutland, VT
RL Kunz dB Noise Reduction / plant noise-panel installation	Developed the acoustic-panel scope, coordinated four consultant walkthroughs and a shutdown installation, normalized vendor bids, negotiated pricing, and verified the installed result	GE Aviation	GE Aviation	Greenville, SC
GE Rutland waste-stream recycling project	Characterized ECM and LPT sludge and other waste streams, shipped samples, qualified recycling vendors, ran a competitive process, and launched a recycling path for more than 20 tons per week	GE Aviation	GE Aviation	Rutland, VT
GE Corporate \$6M carbon-reduction fund allocation	Developed the global project pipeline across 83 GE Aviation sites, created a cost-per-metric-ton-of-CO2 funding metric, analyzed project proposals, and secured adoption of the metric for the final \$6M corporate allocation	GE Aviation / GE Corporate	GE Aviation	Global
Equalization water-tank cleaning	Wrote the scope and coordinated contractor activity for industrial tank cleaning	GE Aviation	GE Aviation	Cincinnati, OH
Oil-water-separator cleaning	Wrote the scope and coordinated contractor cleaning of an environmental-control asset	GE Aviation	GE Aviation	Cincinnati, OH
