EDUCATION

West Virginia University | Morgantown, WV
Bachelor of Science, Chemical Engineering

May 2018

PROFESSIONAL EXPERIENCE

Weigh Anchor | Remote

Project Manager, Engineering & Operations

2022 to Present

- Manage laboratory equipment installation projects for Pfizer, coordinating vendors, schedules, and site readiness.
- Manage construction and infrastructure projects from bid through execution, including estimates, permitting (CGP, NOI, SWPPP), and subcontractor coordination.
- Build process-automation tooling with Microsoft Power Automate, Zapier, and APIs for document generation and operations.

Arcadis Inc. | Seattle, WA

Project Engineer, Client: Seattle Genetics (Seagen)

March 2020 to May 2022

- Managed day-to-day planning, engineering, construction, and handover for biotechnology facility projects.
- Managed \$50M in laboratory equipment installation across multiple projects, plus a \$2M warehouse renovation with city permitting.
- Evaluated biotechnology equipment specifications for procurement based on client requirements.

Evoqua Water Technologies | Colorado Springs, CO

Project Engineer, Fulfillment

May 2019 to March 2020

- Managed \$5.5M in internal water-treatment asset builds across three concurrent projects.
- Coordinated Sales, Applications Engineering, Supply Chain, and Site Execution to align scope and schedule.
- Tracked resources, WBS elements, and customer orders in SAP and Microsoft Project.

Evoqua Water Technologies | Boston, MA

Manufacturing Engineer

April 2018 to May 2019

- Supervised the first shift of the continuous deionization (CDI) product line with 20 direct reports.
- Developed a production scheduling tool that reduced in-process work-in-progress inventory.
- Designed and built a testing stand (AutoCAD Inventor) that improved rotameter part quality.

General Electric Aviation | Multiple sites

Manufacturing Operations & Environmental Health and Safety

May 2016 to April 2018

- Optimized chemical introduction in a closed-loop water treatment system for a 25% efficiency increase; wrote engineering scopes for electrolyte treatment piping redesign.
- Managed NPDES permit compliance, equalization water-tank and swale-ditch projects, and EHS training across sites.
- Managed a \$6M environmental fund, delivering ~23K metric tons of emissions reduction and ~\$2M in annual cost savings.

Dow Chemical Company | Charleston, WV

Wastewater Treatment, Infrastructure

May 2014 to August 2014

- Solicited quotes for sludge dewatering, tank aeration, and clarifier repair on the wastewater treatment plants.
- Wrote confined-space entry, lock-out-tag-out, and fire safety procedures for the WV operations plants.
- Validated storage-tank secondary-containment compliance against WV code; monitored SCADA and managed alarm responses.
