EDUCATION

West Virginia University | Morgantown, WV
Bachelor of Science, Chemical Engineering

May 2018

PROFESSIONAL EXPERIENCE

Weigh Anchor | Remote

Senior Project Manager - Automation, Construction

March 2022 to Present

- Support federal and private-sector construction projects from bid through execution, including estimates, vendor pricing, permit documentation, subcontractor follow-up, and open-item tracking across active jobs.
- Contact suppliers for fencing, materials, availability, pricing, and product specifications.
- Coordinate with owners, vendors, subcontractors, and permitting agencies to move project requirements forward.
- Prepare and manage permit documentation, including CGP, NOI, and SWPPP requirements.
- Track open items, schedule risks, and required follow-ups across active proposal and project work.
- Lead development of AI-enabled document generation and process automation tools for proposal and operations workflows.
- Integrate business systems using Microsoft Power Automate, Zapier, and APIs.

Arcadis | Seattle, WA

Construction Project Manager | Client: Seagen

November 2019 to March 2022

- Managed a portfolio of \$50M in laboratory equipment installation projects across 30 active projects.
- Coordinated equipment manufacturers, contractors, IT, facilities, and client teams to support installation readiness.
- Tracked equipment requirements, vendor dependencies, site readiness, schedule risks, and project handoffs to protect installation dates.
- Monitored project progress and summarized project status, risks, open decisions, and next steps for project leadership and upper management.
- Followed up with vendors and project teams to resolve open items before installation dates.
- Evaluated biotechnology equipment specifications for procurement based on client requirements and installation constraints.
- Supported a \$2M warehouse renovation by coordinating contractor work and municipal permit preparation.

Evoqua Water Technologies | Colorado Springs, CO

Project Manager - Fulfillment

February 2019 to November 2019

- Managed \$5.5M in internal asset builds across three concurrent fulfillment projects.
- Coordinated Sales, Applications Engineering, Supply Chain, Site Execution, and customer teams to align scope, schedule, and delivery requirements.
- Coordinated project schedules, resource needs, and deliverables in MS Project, SharePoint, and SAP.
- Communicated project status, risks, and timing to customers and cross-functional stakeholders.
- Used SAP to process and track WBS elements for customer orders and budget management.

Evoqua Water Technologies | Boston, MA

Facilities - Manufacturing Engineer

June 2018 to February 2019

- Supervised first-shift manufacturing operations for the deionization product line with 20 direct reports.
- Developed a production scheduling tool that reduced in-process work-in-progress inventory by 37%.
- Managed production priorities, staffing needs, and quality issues across the manufacturing floor.
- Used AutoCAD Inventor to design and build a testing stand that improved rotameter part quality.

General Electric Aviation | Rutland, VT

Manufacturing Operations Intern

May 2017 to August 2017

- Optimized chemical introduction in a closed-loop system, resulting in a 25% efficiency increase.
- Wrote engineering scope of work for piping redesign of an electrolyte treatment system.
- Managed a competitive bid process for recycling waste, resulting in approximately \$36K revenue and 1.1K tons of waste reduction per year.
- Coordinated vendors, engineering stakeholders, and site requirements to evaluate disposal options and implement the selected waste-reduction path.

General Electric Aviation | Greenville, SC

Environmental Health and Safety Intern

August 2016 to December 2016

- Created 20 noise-abatement projects and managed them to completion.
- Managed competitive bid process for a noise paneling project, resulting in \$89K per year in cost avoidance.
- Investigated and closed 20+ safety concern reports to maintain safety compliance.
- Conducted Environmental Health and Safety training for on-site staff.
- Coordinated project owners, vendors, and operations stakeholders to close safety actions and maintain compliance timelines.

General Electric Aviation | Cincinnati, OH

Facilities - Environmental Health and Safety Intern

January 2016 to May 2016

- Managed competitive and sole-source bids for water tank repair and swale ditch cleaning projects.
- Developed and maintained a network of key opinion leaders across GE Aviation sites.
- Conducted training on utilization of a new environmental project submission platform.
- Managed a \$6M environmental fund, resulting in approximately 23K metric tons of CO2 reduction and \$2M annual cost savings.

General Electric Aviation | Middle River, MD

Environmental Health and Safety Intern

May 2015 to August 2015

- Investigated and closed 100+ safety concern reports to maintain safety compliance.
- Managed bid process for dock improvement projects, generating \$40K per year in savings.
- Updated the company respiratory protection program, including more than 400 individual assessments.
